

## LONG YEARS AGO

July 17, 1903

The C.P.R. has commenced work on the new side track at Didsbury.

Eight new residences are to be erected in Didsbury this summer.

A start has been made on hay cutting here and the hay crop promises to be a good one.

The Ostivie Milling Company will put in 18 new elevators in the west this year.

John McQuarrie has gone south for another car of horses.

J.H. Raymer commences building a house on H. Bricker's place today. A barn will also be erected.

Don't forget the official opening of the Didsbury Municipal hospital on Friday afternoon, July 20th.

## SUMMER NEEDS

Rexall Grape and Lemon Salt ..... 50c

Effervescent Fruit Saline and Glass, both for ... 45c

Eno's Fruit Salts .59c; 98c

Wampoles Grape Salts .50c

Deodorized Fly Kil (sure death to flies) ... 24c; 33c

White Petroleum, 4 oz. 19c

Sani-Ped Foot Balm (cools those hot feet) ..... 60c

Sani-Ped Foot Powder .35c

Johnson's Baby Needs Set ..... 50c

British Tooth Paste ... 29c

Lavender Mentholated Shaving Cream ..... 35c

Assorted Talcums, each 35c

Trushty Hand Lotion .50c

Ilasol Hand Lotion 30c; 50c

Diaperwite (for baby's diapers) soak 'em, rinse 'em and use 'em. Pkg 39c

## HOMING PIGEON ON THE A. BAUDISTEL FARM LAST WEEK

Possibly Lost in Storm on Calgary-Edmonton Flight

A. Baudistel, seven miles west of Didsbury, discovered a homing pigeon on his farm Thursday morning while going to work in the field. He saw the bird in the grass and thought it was lost. After a careful examination he noted that both feet were banded, one with a metal tag and the other with an elastic band.

Mr. Baudistel took the bird home and after feeding it and looking after it for a day, turned it loose Friday.

Obviously the pigeon was one of those let loose last Wednesday by fly between Calgary and Edmonton when one pigeon made the trip in 6½ hours.

Possibly the pigeon was caught in the storm which raged for two days Wednesday night and being taken off its course by the wind, and becoming exhausted, it found refuge on Mr. Baudistel's farm.

## BERGEN NEWS NOTES

Don Mjolsness of Edmonton is visiting his relatives here in Bergen. Sergeant Harold Erickson and family are staying at Bergen again. Donnie Erickson is clerking in the Bergen store.

Mildred Tomlinson and Betty Erickson who have written their Grade XII exams, are at home.

Leonard Milkkelborg and family visited his sister, Lena, near Big Valley last week.

Clarke hitched her tractor to the tractor on Friday and took the children to the clinic and to the store.

A few of the Bergen people are attending the Didsbury camp meeting.

A most piece of road work has been done north of Ben Littlehouse's corner. The Burma road had nothing on this road, nor the bottomless pit.

Fred Admussen had a telegram from his son George. He will be home soon for a visit before going over and having a round with the Japs.

## DRUG ADDICTS BREAK INTO DR. H. W. EPP'S OFFICE

A man and a woman, who have so far not been identified, were in the district last week. First report stated they had broken into Dr. Epp's office and doctor's car at Irricana early last Wednesday morning. They then went to Olds where they broke into Dr. Harvey's office and took a quantity of morphine tablets. From there they came to Dr. Epp's office in the theatre building, taking a quantity of morphine tablets. The ceremony was performed by Padre D. Houston, R.C.N.V.R., and the altar provided the back drop for the ceremony while tall tapers combined with the blossoms formed the altar setting.

The bride's only attendant was Leading Wren Alice Randall of Guelph, Ontario, who wore a beautiful gown of heaven blue silk net. The graceful full skirt was topped by a matching blue lace bolero and her hair was styled with a full circle of pink carnations. Her bouquet was of carnations of varying shades of pink.

The groom was attended by Petty Officer Harry Jennis of Vancouver, B.C.

While the bride and groom signed the register, L.Wren Naomi Hughes of Niagara Falls, sang "Because," and L.Wren Shirley Johnson of Lethbridge played the wedding music.

Petty Officers Rod Alexander and Kenneth Robertson acted as ushers.

According to custom the wedding car was pulled from the church by a company of Wrens and Sailors to a reception in the Wrens' Recreation Hall. Lt. Commander Doyle, R.C.N., proposed the toast to the bride.

For going away the bride chose a softly tailored suit in pale grey blue wool boucle. Her accessories were dull black and her top coat a straight model in tones of greyed blue.

Mr. and Mrs. Reynolds said a short honeymoon at Chetton, N.S., before returning to their respective service posts.

## LT. RICHARD WALLACE RETURNS FROM PRISON CAMP

Lt. Richard Wallace, Calgary Regiment (Tank), who had been a German prisoner of war in Camp Oflag since Dieppe, is expected to arrive in Calgary July 18th. He was released by the Americans last April.

Prior to going overseas in 1941, Lt. Wallace was manager of the Atlas Lumber Yards in Didsbury, his wife, Mrs. Phyllis Wallace, lives in Calgary.

## WEDDINGS REYNOLDS-EDWARDS

On June 20th, Lois Jean, only daughter of Mr. and Mrs. D.A. Edwards of Didsbury, was united in marriage to NaDoo Willman Reynolds, youngest son of Mrs. Anna Reynolds and the late Mr. Morton Reynolds of Campbellford, Ont., in the Naval Chapel at HM.C. "Protector," Sydney, Nova Scotia. The ceremony was performed

Apple blossoms flanking the altar by Padre D. Houston, R.C.N.V.R., and the altar provided the back drop for the ceremony while tall tapers combined with the blossoms formed the altar setting.

The bride's only attendant was Leading Wren Alice Randall of Guelph, Ontario, who wore a beautiful gown of heaven blue silk net. Mr. and Mrs. Reynolds said a short honeymoon at Chetton, N.S., before returning to their respective service posts.

## NOTES FROM THE EAST

The annual Women's Institute Constituency Conference is to be held Saturday, July 21st in Didsbury.

A large number from the district attended the Calgary State this year for a day at least, including Mr. and Mrs. Walter McCullough, Mr. and Mrs. Harold Sheils, Mr. and Mrs. Bruce Sheils, Mr. and Mrs. John Jokinen, Mr. E.A. Woods, Mike Pagan, Roy Dougall, Mr. and Mrs. W.H. Coates, Jean and Arthur. All reported having spent an enjoyable time, especially those who were in on the Saturday rain.

In last week's issue we stated that in the shafts at Lone Pine the married men played the women. Now Fred Metz is very worried that some of the ladies will be disappointed when they saw this because Fred is still a bachelor and single people would do well to take note of this.

The east country is on the up and up and farmers are doing some improving. Mr. Bruce Sheils has started to build their new home. He has the foundation, and here's good speed. Also Mr. James Cullough is building a new farm home and is well on the way with it. Fred Metz is taking down some old buildings and putting up a nice new barn. There are some prospects of a few new bridges and culverts being put in, thanks to our compiler.

Mr. and Mrs. Reynolds said we stated that in the shafts at Lone Pine the married men played the women. Now Fred Metz is very worried that some of the ladies will be disappointed when they saw this because Fred is still a bachelor and single people would do well to take note of this.

## Standards Of Public Health

**CASUALTY LISTS** are one of the most distressing features of war, and the prevention of large scale suffering and loss of life is perhaps the greatest motive underlying efforts to establish permanent world peace. Shocking as casualty figures are, however, our attention is frequently drawn to the fact that disease each year claims civilian lives in numbers exceeding those of battle casualties, and it is apparent that there is a need of increased public interest in this aspect of the national welfare. Public health education, medical research, further extension of medical services and higher standards of nutrition, are among the measures necessary to combat disease and to bring about a reduction of the civilian deathrate. All these measures require large expenditures of public funds, and they also require widespread interest and support on the part of the people.

### Canadians Now Live Longer

If illness were reduced by one-half, the saving to the people of Canada in suffering, loss of life and in money would be considerable. During the past fifty years, great progress has been made here in combatting disease. If these efforts are continued and expanded, we may look for even greater improvement along these lines in the future. In Canada during the last half century, the average length of life has been extended from 45 to 67 years, and the infant mortality rate has been steadily reduced. In that time too, many of the diseases which formerly claimed a large number of lives each year, have been brought under control, or completely stamped out.

### Great Progress Has Been Made

Records show that some parts of Canada have progressed more rapidly than others in eradicating diseases which can now be controlled through immunization and other means. In communities where immunization for diphtheria has been extensively carried out, this disease has practically disappeared. In some instances, statistics show that it has not occurred for as long as fifteen years. Pasteurization of milk is believed to eliminate the spread of such diseases as typhoid, bovine tuberculosis, septic throat and many illnesses contributing to infant mortality. In areas where pasteurization is compulsory, the frequency of these diseases has been greatly decreased, and there has been improvement in the general standard of health. In 1927 there were 1,112 deaths in Canada from typhoid, while in 1942 the deaths from this disease numbered 108. With continued interest and support on the part of health authorities and the public, we may hope that similar encouraging figures may soon apply to other diseases which have not yet been brought under control, and that the standard of public health in Canada may continue to improve.

### Underground Castle

German Legion in Switzerland Was Furnished Luxuriously

A Swiss official disclosed that when police examined the now-clashed German legion at Berne, they found beneath it a vast underground fortress.

Beneath the house there were huge subterranean rooms furnished with the most luxurious comfort," the official said. "The main room was a large, massively walled chamber built like a bank strongroom. It housed an amazing quantity of the most modern technical equipment—mostly radio, for direct commanding with Berlin."

"The underground building was prepared to stand siege or air attack."

### GEMS OF THOUGHT

#### HUMAN UNITS

In a great house there are not only vessels of gold and of silver, but also wood and earth, and some to honour and some to dishonour.—St. Paul (II Timothy 2:20).

Great political questions stir the deepest nature of one half the nation, but they pass far above and over the heads of the other half. Wendell Phillips.

The worth of a State in the long run is the worth of the individuals comprising it. John Stuart Mill.

The Christianity that is merely of the sects, the pulpit and fashionable society is brief, but the Word of God abideth. Mary Baker Eddy.

Wait not till you are sure of an echo from a crowd. The fewer the voices on the side of truth, the more distinct and strong must be your own. Channing.

The true grandeur of nations is in those qualities which constitute the true greatness of the individual.—Charles Sumner.

#### SMART MEXICAN

Sgt. Hector Felipe Jimenez Rubio, a Mexican army man attached to Lowry Field, won the title of the typewriter tornado because he types 120 words per minute in English—a language he can't read.

### New Giant Liner

Britain Will Likely Build Another Of The Queen Class

Britain's entry for the post-war blue ribbon of the Atlantic probably will be a third giant liner of the Queen class. Commodore Sir James Bisset said as he told how the graphic wartime saga of his \$1,235-ton Queen Mary at New York on her first visit to the United States since the war ended in Europe.

Emphasizing that he was expressing only his personal opinion, the bluff captain of the Queen Mary painted an optimistic picture of the future of the steamship in a post-war world in which the airplane may play a predominant part.

The 62-year-old commander of the Cunard White Star fleet dismisses suggestions that the airplane will seize command of the trans-Atlantic passenger trade. He declared: "Ninety per cent of travellers will prefer to go by ship, just because it is a ship."

**LOSS IN STOCKS** — Francis J. Smith of Toronto, Ont., discharged from the R.C.A.F. after four years of service overseas, says he was deceived by a Toronto stock promoter. He says he bought 1,000 shares of a gold mining stock while working as a civilian construction hand at Goose Bay in Labrador in August, 1944. He received a letter, he says, acknowledging receipt of his cheque, but no certificates. The stock went up, but he could not dispose of it, because he had no certificates. Finally when the certificates were forthcoming the stock had dropped below the purchasing price and he lost money.

### Price Control And Rationing Information

Q.—How many pounds of honey am I allowed for my company? My grocer would give me only one pound.

A.—Your grocer should have given you two pounds of extracted honey for one coupon.

Q.—Will I be able to obtain sugar to feed my bees? I do not sell the honey.

A.—A beekeeper who requires sugar for his bees to winter should register with the Ration Administration as a Primary Producer of honey, but must register with his Provincial Apharist in order to obtain sugar.

Q.—Do I do if I have lost my ration book?

A.—Go to the local ration board. There you will make a statement or take an affidavit as to the fact that you have lost your ration book. Further instructions regarding the obtaining of this ration book will be given to you at that time.

Q.—Do ration coupons issued to members of the armed forces for members expire?

A.—Ration coupons issued to members of armed forces do not expire.

Please answer my question or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of wartime prices. I am enclosing a copy of this paper to the nearest Wartime Prices and Trade Board office in your province.

### Elephant Labor

#### Unique Unit Worked For The British Army In Burma

They don't give medals to elephants but no story of how the long, drawn out war in Burma was won would be complete without mention of "Elephant Bill" Williams' unique arm unit.

There is no other military outfit like it anywhere. It is a labor company made up solely of elephants—more than 200 of them—and their handlers.

Their main job was building log bridges and carving roads through jungles, mountains and swamps before the war began. But the elephants carried out many other important assignments like evacuation of the sick. Each animal could carry three men 12 miles a day over roads that were impassable even to mules.

This man is Lt. Col. J. H. Williams, one of the world's foremost experts on organization of elephant labor who is known throughout Burma as "Elephant Bill." He is a tall Cornishman who fought with the Devon regiment in Egypt and Mesopotamia in the First Great War and then spent 26 years in Burma as an employee of the Bombay-Burma Trading Corporation.

About 5,000 elephants, formerly belonging to the big teak extraction firms and local contractors, were left behind in Burma. The Japanese, who had used this type of transport in bringing their mortars to use through Siam, continued to use them in Burma.

In November, 1942, a group of British officers and natives, headed by Col. Williams, managed to "persuade" 40 elephants to bolt from the Japanese lines on the Chindwin banks. Women and children volunteered as mahouts.

This herd, was the embryo of the present organization.

The colonel's elephants have been asked to crank broken down trucks, and to have guns fired from their backs.

### Sea Power Essential

#### Royal Navy Is One Thing Britain Cannot Do Without

A. V. Alexander is known for his great and jealous love for the Royal Navy and it was not surprising that he should be reminding us of the pre-war neglect of our sea defences and urging us never to forget the needs of naval power. Certainly it was Germany's weakness in this sphere, coupled with her real weakness in the air, though this was far from apparent at the time of the famous escape voyage in 1940. Hitler's ambition, based on a misunderstanding of our willingness to go to war, led him to open a conflict for which he was not prepared and for which he had not even had time to prepare—Manchester Guardian.

#### MEANT WELL

A well-meaning stranger on a Party Sound-Tract train committed a six-year-old Donald Barringer of Party Sound. The boy was being rushed to the Toronto hospital for sick children to have an obstruction removed from his throat. The obstruction was a peanut.

Marine engines, a million times

bigger than watch mechanisms, must be constructed with the same accuracy.

In normal times the United States averaged 11 pounds of coffee per person annually; in England, it was less than one pound.

### THE BEST WAY TO KILL FLIES

1/8 package of WILSON'S FLY PADS will kill more flies than \$5.00 worth of any other fly killer in the market today! Use WILSON'S FLY PADS today!

#### Using New Method

##### Quick Freeze Process Will Keep Milk In Normal State

United States Army scientists have perfected a method for the "quick-freezing" of milk that enables their hospital ships to serve wounded soldiers a beverage tasting as fresh and appetizing as the product which the milkman left on the doorstep this morning.

About 30,000 pints of milk frozen by the new process, are now being shipped each month, principally for use on ships that are returning sick and wounded men from battle zones. The quick treatment, invented Overseas hospitals also are receiving shipments in ever-increasing amounts and about 100,000 pints a month are being shipped for general use by American troops in Alaska.

The Army's system has suggested interesting peacetime application of the new process in supplying civilians from dairy sources.

Although, in some instances the milk has been kept in the frozen state for three months, it tastes, when thawed, as fresh as if it had just come from the cow, according to army spokesmen.

Formerly, the only milk that hospitalized men and all overseas troops were able to obtain was made from milk powder. While the nutritive value was high, the taste left much to be desired. And the problem was a serious one in the case of incapacitated men on liquid diets.

Experiments showed that milk were frozen from extreme rapidity at 20 degrees below zero, Fahrenheit, it froze in tiny crystals, and as a result the milk thawed in its original condition.

### SELECTED RECIPES

#### GOLDEN BROWN FISH

The fish that swim the seven seas, and all the inland brooks, offer mankind an abundance of variety in wholesome food. And they are available fresh or quickly frozen in markets almost everywhere these days.

As a general rule, fish is easier to prepare than meat. Fish cooks, baked, broiled or pan fried quickly, is easily separated from the bones, and in the case of baked, broiled pan or oven-fried fish, the crisp outer coating.

This much is to be desired crisp coating is easily achieved by dipping the fish in salted milk, then in oven-popped grain, and finally in flour. This separates from the bones, and in the case of baked, broiled pan or oven-fried fish, the crisp outer coating.

This much is to be desired crisp coating is easily achieved by dipping the fish in salted milk, then in oven-popped grain, and finally in flour. This separates from the bones, and in the case of baked, broiled pan or oven-fried fish, the crisp outer coating.

As this is the case, the fish need not be disturbed by turning. Almost all types of fish are delicious prepared this way—small fish are fried whole and the larger ones cut in slices and fried.

Oven-fried fish are prepared according to the following recipe. Allow one-quarter to one-third pound of fish, fried or sliced fish per serving. Allow one half pound per serving in the case of fish to be left whole.

#### OVEN-FRIED FISH

1 pound fish  
3 cups oven popped rice cereal  
1 tablespoon salt  
1 cup of milk  
4 teaspoons salad oil or shortening

Cut fish into serving pieces. Place each piece into oven popped rice cereal and dip in milk. Add salt to milk. Dip fish in milk then in cereal and arrange on well greased baking sheet. Spread oil or shortening over top of fish. Bake at 425 degrees for twenty-five minutes.

Yield: 4 servings.

Note: Frosted fish can be used. For richer eating use undiluted evaporated milk.

The petroleum used in automobiles contains the energy that was stored up by plants and animals thousands of centuries ago.

#### THE QUEENS WERE BUSY

British's cracklin' Queen Mary and the Queen Elizabeth, between them, transported 1,243,538 persons from the beginning of the war to the capitulation of Germany. It was disclosed in an official white paper issued in London. American and Canadian soldiers constituted the bulk of the 889,694 persons moved east across the Atlantic. The ships carried a division at a time.

Marine engines, a million times bigger than watch mechanisms, must be constructed with the same accuracy.

## Air Over Ocean Is So Full Of Planes That Pilots Must Be Careful To Avoid Collision

EVERY twenty minutes a plane leaves this country for Europe, and as often one comes from the other side of the Atlantic to this country, writes Russell Owsley in the New York Times. The air over the North and South Atlantic is full of planes, day and night, on the various routes, so many of them that pilots have to be careful to maintain their proper altitude to avoid collision, and even with the greatest caution they frequently miss each other by narrow margins.

Flying the Atlantic used to be a great adventure; men who first did it declare he has seldom had to use were among the heroes of aviation, its deities. But there can be troubles on this northern passage. When close to Cape Farewell, the southern tip of Greenland, the pilot should receive a radio signal to obtain his bearings. Instead, he may hear only over the earphones a crackling sound. And if he has picked up a wind, he may be shrouded by clouds over the broaded Greenland ice instead of being over the sea south of Farewell. That could be pretty bad. Fortunately the pilot carries a sun compass, using wind drift that may help him escape danger. But he is thankful when radio signals again come in. Hourly he sends back radio weather reports to guide other planes and contribute data to the master chart on shore which plots reports on all planes.

Pilots generally choose a height between 5,000 and 12,000 feet above sea level as found the most comfortable for flying the North Atlantic. If flying by day, the pilot may encounter a dense cumulus cloud far higher than this. If forced to enter it, half and sheet will soon ram against his plane. By night the cloud outlines are invisible but its presence is felt like a black envelope.

A frightening phenomenon may then occur day or night. Friction of the halistones electrifies the plane into a big Leyden jar. A bright light will glow at the end of the nose, extending to bathe the wing tips, and making the propellers spray light pinwheels. A sharp explosion may take place, setting fire to the lights. It would simply be a discharge of static. Then the plane will become normal and its lamps glow again.

Many Atlantic pilots think that when passenger air traffic across the sea grows popular after the war, in high altitude planes, the northern passage will still be the favorite route. And this notwithstanding that post-war planes with air pressure cabins will be able to fly above most weather turbulence.

Weathers does not bother planes when it comes to landing and almost never is a flight called off because of bad weather conditions in Europe. If a pilot can't land in Scotland he can come down in England or Wales. Somewhere in the British Isles there is always an airport into which planes can land and there is a system of landing planes to those landing fields so perfected that it would be almost impossible for an experienced pilot to get into serious trouble.

It was a good tribute to our navigation, but it shows how necessary it is to be on your toes. The greatest danger in flying the ocean is getting dozy. We try to keep our altitudes, which should keep us at levels 1,000 feet apart, but sometimes the altimeter gives a bit haywire. And instruments do not always show immediately that something is going wrong. An engine failed on me once, but it kept turning and using gas, as they will, and the revolutions did not drop. I finally spotted trouble only when the engine temperature began to fall. Then I feathered the prop and went on with three engines quite comfortably. You know you use up quite a lot of gas in a big plane, 1,200 pounds of it an hour, and after a third three in comes nearly the weight all right. But you have to keep your eyes open."

### Job Is Unusual

**Canadian Navy And Royal Navy Have Women Flag Lieutenants**

The first woman flag lieutenant in the Royal Canadian Navy is Lieut. Marion O'Toole of Montreal recently appointed "flag" to Rear-Admiral H. E. Reid, C.B., R.C.N., naval member of the Canadian Joint Staff in Washington.

Shattering another precedent of the senior service, the attractive admiral's aide accompanies the senior naval officer to official functions, and carries out arrangements of protocol. She acted as flag lieutenant for the first time when she accompanied the admiral to the commissioning of H.M.C.S. "Ungava", Canadian cruiser now in the Pacific, and when he now goes on board ships for inspection, she goes along.

Thrilled at the appointment, Lieut. O'Toole is compiling notes these days with her "opposite number" in the Royal Naval Service, Miss Margaret Officer Marion Stuart Clarke, flying lieutenant to Sir James Somerville, admiral of the fleet, the only woman to hold such a position in the Royal Navy. The two will attend the joint sitting of all ocean routes, and most land routes on this continent. A pilot who has often flown

**YANK WEDS RUSSIAN PRINCESS**—Princess Xenia Romanoff, 26, grand-niece of the late Czar Nicholas II, and 1st Lt. Calhoun Antrim, Jr., of Camden, S.C., are shown as they were married in the Russian Orthodox church in London. The bride has been a British subject since 1938.

### Played Key Part

**Canada Helped Beat The Best Scientific Brains Of Germany**

One of Britain's top "brain-hush" men was Thomas recently Charles Seymour Wright, Toronto-born Chief of Scientific Research for the British Admiralty and true to the traditions of modesty of a man of science, he could say little of some of the wonders which have been evolved in, or come out of this war.

Mr. Wright could reveal, however, some of the post-war plans of the British Admiralty and he could give Canada a big "thank-you" for its work in helping beat the best scientific brains of Germany, and did add some remarks about the necessity of keeping up research in the days of peace, with Canada playing a key part in this.

He echoed the sentiments of some of Canada's military men when he said that never again must the British countries or the United Nations, advisedly let their efforts in defense research slacken in peacetime when they have done before. And he thought there must be an interchange of information and scientific brains between ourselves, Britain and the United States to maintain this research at peace.

Canada, he added, would probably assume the research centre, or at least, he hoped it would, acting as the welding link between the United States and Britain and at the same time contributing her own vastly enlarged technological ability. As he put it, "we in Britain have the scientific facilities, but you in Canada are better at ways of turning ideas into hardware."

The Admiralty scientist hoped that Canada would maintain her own "splendid" facilities, such as Research Enterprises Limited, in Leaside, and keep up the work of the National Research Council, as well as seeing to it that private industry keep up on its technology for defence.

### LOSSES WERE HEAVY

**Eight of Thirty British Scientists Lost**

More than 30,000 men of Britain's who were to visit Russia for the merchant navy lost their lives during the war. Sir Cyril Harecomb, director general, ministry of war Government to take the trip. Their transport, said, four thousand were services too essential for the war wounded, 4,000 interned or taken against Japan to be interrupted. It was stated.

### MUST STAY HOME

**Eight of Thirty British Scientists Lost**

More than 30,000 men of Britain's

merchant navy lost their lives during the war. Sir Cyril Harecomb, director general, ministry of war Government to take the trip. Their transport, said, four thousand were services too essential for the war wounded, 4,000 interned or taken against Japan to be interrupted. It was stated.

**HON. J. L. ILSLEY SIGNS AUTOGRAPH FOR CARRIER BOYS** Hon. J. L. Ilsley, minister of finance, is surrounded by carrier boys, as he complied with numerous requests for his autograph. These boys represented newspaper carrier boys across Canada at the christening of one of the Commando planes purchased by Canadian carrier boys' sale of war savings stamps. Gilbert Johnson, 13, holds the R.C.A.F. plaque won with \$1,500 sales. He lead all Canada.

## As History Was Made In The Air, The Most Storied Places Of Britain Was Home To Our Airmen

(Written for The Canadian Press by Flt. Lt. Frank Tinsley, R.C.A.F.)

**F**OR the Battle of Britain to V-E Day, as history was made in the air, the quiet streets and byways of some of England's most ancient and storied places formed the background for the part played in victory by the men and women of the R.C.A.F. At work and in their spare time, the Canadians came to know the scenes of legend and beauty of England; the roar of their bombers reawakened the half-forgotten historic battlefields.

The RCAF Bomber Group, which initially became something of a legend, can lounge-place on the English Channel.

Ancient Gloucester, with its beautiful sweep moorlands and world-famous cathedral dating back to 823, was a constant attraction for Canadians based temporarily at the campsite in Emily Bronte in "Wuthering Heights" made the pilgrimage to

London saw more Canadians than Cromwell ever did, any other place, for in the borough of Holborn, in two large buildings flanking Lincoln's Inn fields, RCAF overseas headquarters has been located.

To most Canadians, castles are legends read about. Yet hundreds

of thousands of years old, have been built within the ancient walls of Allerton Hall, which became the headquarters of RCAF Bomber Group. It was formerly the country seat of the Earl of Mowbray.

RCAF Coastal Command squadrons have been located in no less historic places. The Demon Squadron operated from Birchin Newton, Norfolkshire, in the heart of the Fen district. Thence they moved to North Devon, where they lived among some of the loveliest scenery in England.

Not far from the region known as the Vale of the White Horse, in picturesque Wilshire, the Lynx night-fighter squadron and the husky Transport squadrons were based. This land described in the opening chapters of "Tom Brown's School Days" near here, too, King Alfred defeated the Danes at the Battle of Ashdown, and here the heart beats the legend that not far away, Dragon's Hill, St. George slew the dragon.

The City of Vancouver bomber squadron knew stately Cambridge, whose university myth has it was founded by Prince Cantaber of Spain, although most books agree it probably grew up around the religious establishments of the early 12th century.

Plymouth, Hoe, Devon, where Drake tarried to finish his bowls before he smashed the Spanish armada, knew the sound of Canadian fighter aircraft. The smugglers' coves of Cornwall, the beaches of Hastings, Kent, over which William the Conqueror's men swarmed in 1066, much as Hitler's hordes hoped to do, knew it too. The beautiful Lorna Doone country of Devon played host to RCAF air and ground crews.

Near Liverpool, where thousands of RCAF men have sailed for home is the ancient town of Warrington. Here at the repatriation depot, they waited for their ships on the site of Cromwell's victory over the Scots in 1648.

To Bournemouth, one of England's most attractive seaside resorts came new arrivals, and after V-E Day, hundreds of returning ex-prisoners of war. The RCAF No. 3 personnel reception centre was set up in what Thomas Hardy, in his "Tess of the D'Urbervilles," called "a Mediterranean

### British Films

**Would Build Many Movie Theatres In Canada**

J. Arthur Rank, British movie producer, said the film producing companies he controls are planning a large post-war expansion in Canada, Latin America and Europe—and we're looking over the United States."

On a two-month tour of North America, beginning in Canada and ending in California, Mr. Rank said in an interview he was particularly interested in "getting acquainted with the American people and finding what they like in motion pictures."

He said his companies now have 120 theatres in Canada but have selected sites for building "large numbers more after the war." A Latin American headquarters will be set up "in the Autumn", and British films for Spain, France and China already are being made with speech or captions dubbed in. Mr. Rank noted.

He added that British post-war movie plans included use of both British and American stars, "known and unknown".

### Dainty and Useful

7081

by Alice Brooks

You'll be fascinated with this crocheted square. Just the right size, for pillow tops or sachet doilies. It's a simple square.

Works up fast; it's a 12 to 16-inch square, depending on type of cotton used. Pattern 7081 has crocheted edges and a scalloped border.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg, Manitoba, Canada. Write clearly your Name, Address and Pattern Number. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

### Will Visit Ulster

The Duchess of Kent is to pay her first visit to Ulster some time this summer. She was to have gone with the late Duke of Kent just before the war, to launch a ship, but was unable to do so owing to events in the political world in Ulster at the time.

## **OFFICIAL OPENING OF NEW HOSPITAL**

---

The official opening of the new Didsbury Municipal Hospital takes place on Friday afternoon, July 20th, after a delay of about three months due to unforeseen difficulties in getting material and furnishings for the institution. This, however, could be expected in these times of war shortages.

The new building is a credit to the people of the district and their foresight in planning and providing for the building of the hospital should reap its reward in the alleviation of suffering of themselves and their families in the years to come.

The 25-bed hospital should be ample in size for the immediate needs of the district, and patients can have the confidence that the facilities at their disposal in times of sickness will be equal to that provided in the much larger centres.

You are invited to attend the official opening of the hospital on Friday afternoon, and inspect the new building before it is opened to the public. The official ceremony is scheduled to take place at 2:00 p.m., so be on time.

IMMIGRATION AND CANADIANISM

Canada is now recognized as one of the leading countries of the world with possibilities of advancement far beyond that of any other nation. But to make the progress we should a much larger population is needed. And to get this increase in peoples there is only one course open, and that is immigration. Right now with our own boys coming back we must put our efforts into getting them established in industry and agriculture. By the time this is done there will be thousands of applications from prospective settlers to deal with. Right now these applications are coming in, but our immigration laws are strict—and justly so. When Canada was thrown open to emigrants 20 years ago we had many settlers who could not be classed as desirable citizens, and many others who did not come here to help build up our country, but only to make a "stake" and return to home lands.

Under any new immigration policy advanced by our government settlers should not be admitted to Canada unless they agree to take out their naturalization papers and become good Canadians.

— But what is a Canadian? Our parliament in years gone by has never seen fit to call us Canadians. We had a racial origin, and that was all.

This must be abolished and the term "Canadian" applied to native born people, and to naturalized citizens. Until this is firmly established our government cannot expect people to take the pride in their country of birth or adoption. United States is a younger country in years of settlement than Canada, yet if you are born in the States or become naturalized there you are an American. But in Canada in the past you have not been a Canadian. Your racial origin was your nationality, if you were given that status.

In Canada we want to be Canadians and it is high time that our government took the action to see that we are called Canadians, if they have not already done so.

observation, the professor decided that the source of the trouble was the women's inability to remember the exact shade of red for pieking. As he watched, an idea struck him. Why not mix a shade of nail polish the colour of ripe tomatoes so that the women could have a standard guide at their finger tips all the time? It worked, and sure enough

whenever a woman reached for the tomatoes, she picked only the ripe ones.

## OUR TARIFF POLICIES

(By H.G.L. Strange)  
Another Government has been elected for Canada. The policies of the new government will affect during the next five years will have a profound influence upon the welfare of the people of Canada. No group will be more affected by the Government than our Prairie farmers, for our farmers depend for their welfare mainly upon the export of a high proportion of their agricultural products.

This new Government has committed itself to a policy of increasing exports. For decades past the most general policy of the Party has been in the reduction of tariffs. The lowering of tariffs is an issue not only with Canada but with many other countries in the world. All countries are beginning to feel that the high tariff policies which gripped the world after the last war were wrong and brought misery and suffering upon millions of people. Let us hope for the sake of the well-being of our Prairie farmers that the Government will put into effect its long stated policies as regards the reduction of export taxes by the lowering of tariffs, so as to permit the importation into Canada of a greater volume of foreign goods, which goods form the only real money the foreigner has with which to pay us for the flour, wheat and other agricultural products he buys from us and from people of the world. The citizens of these prairies are quite within their rights in pressing their elected members, and the Government itself, to proceed with their avowed policy of lowering tariffs.

## WHERE THE GAS GOES

Each home-coming Canadian bomber uses 2,500 gallons of aviation gasoline in its trip back to Canada from England, which is just another reason why there will be no increase of the gas ration.

## DAIRY PRODUCTS UP

During the first quarter of 1945, dairy production was encouraging, peaks of creamery butter to the end of March at 36.5 million pounds was 1.6 per cent greater than in the corresponding period of 1944. Cheese production at eight million pounds was higher by 4.8 per cent. The production of all pasteurized milk products reached higher levels in 1945 and indications are that fluid sales to consumers were also higher. The improvement in the production of butter, together with restricted consumption due to large cuts in the ration, has brought about an improvement in butter supply and requirement position.

Ten Victoria Crosses have been awarded Canadians so far in this war.

## IN MEMORIAM

**GARNER**—In Loving Memory of our Mum on her 21st birthday, July 19th, who died in Holland January 16th, 1945.

No one knows how much we miss you. We know the little pain. We have suffered since we lost you. Life has never been the same. In our hearts your memory lingers. Sweetly tender fond and true; There is not a day "Dear Jack"; That we do not think of you.

—Ever Remembered by Mum, Dad, Grace, Don and Edith.

## ECLIPSE OF THE SUN

Bredenbury, Sask., has only 450 people, but a world's highlight was the eclipse of the sun. Bredenbury was the mecca of leading astronomers and scientists from the United States and Canada.

They picked Bredenbury, these astronomers, because it is the most northerly point located on a railway and within the direct path of the eclipse which ran across Montana, Saskatchewan, Manitoba, Labrador and Russia.

Most of us who have been around when an eclipse of the sun has had to have merely found ourselves a pair of smoked glasses, or a piece of smoked glass. But not the astronomers and scientists. They go to great pains, and require an enormous amount of equipment.

## WHERE THE GAS GOES

Each home-coming Canadian bomber uses 2,500 gallons of aviation gasoline in its trip back to Canada from England, which is just another reason why there will be no increase of the gas ration.

## DAIRY PRODUCTS UP

During the first quarter of 1945, dairy production was encouraging, peaks of creamery butter to the end of March at 36.5 million pounds was 1.6 per cent greater than in the corresponding period of 1944. Cheese production at eight million pounds was higher by 4.8 per cent. The production of all pasteurized milk products reached higher levels in 1945 and indications are that fluid sales to consumers were also higher.

The improvement in the production of butter, together with restricted consumption due to large cuts in the ration, has brought about an improvement in butter supply and requirement position.

## CANADIAN GROWN SEED TO UNITED KINGDOM

We've all heard and read a good deal about the immense amount of food that Canada has sent to the United Kingdom since the start of the war. The figures add up to a staggering total, and a by-product of this export of food to meet the needs of the Island Fortress is the fact that Canadian products are even more familiar to British people than they were before.

But as a result of Canadian ship-seeds in vegetable and field root seeds in particular, the United Kingdom was able to produce over 3,000,000 additional tons of food. A total of 4,100,000 pounds of seeds were sent over for this purpose.

To send this amount there was need for expansion in the seed industry. Canadian seedsmen rushed into the breach and the vegetable seed industry grew from an annual total of \$120,000 before the war to more than \$2,000,000.

## NOBODY CHASES LAYING HEN

PLASTER ROCK, N.B.—Barber shops aren't generally thought the place for a hen party—but one little Sussex hen seems to have a mind of her own.

She flew through a barber's window at Plaster Rock one day and took a look at a wastepaper basket and decided that was the place for her nest. She liked it so well she kept right coming and by June 23rd had laid a total of 60 eggs.

The barber doesn't object. He says Biddie has behaved like a regular lady.

## Minimum Wages

Well informed farmers are glad to acknowledge their debt to progressive legislation. It is known that improved varieties of crop plants and methods for protecting plants and animals from diseases, insects, etc., are developed largely through the work of scientific training men. By far the largest, these men are greatly underpaid, and with similar, sometimes inferior ability, training and experience commonly earn much more in other professions. Most of our scientific agriculturists are in government employ. Salaries are professional, in general, much lower in departments of agriculture than in other government departments.

Entirely aside from fair treatment of workers, there is the immediate attention of farmers.

In recent months several of our best workers have received very attractive offers from the United States. These offers will probably increase in the near future, and many will be accepted as "exit permits" before available. Good-bye to our best men.

The second consideration is this.

Students must decide early in their university careers what type of work they will follow. If they discover that they might be interested in training in agricultural science—closely business—will be rewarded with a salary little better than that demanded by unskilled labour, they will turn to something else. In other words, we cannot expect to continue to get first-class talent for third-class pay.

NOTICE TO RESIDENT NON-RATEPAYERS  
IN THE DIDSBURY  
MUNICIPAL HOSPITAL DISTRICT No. 33

Resident non-ratepayers in the Hospital District may receive hospital treatment at the rate of \$1.00 per diem, upon payment of a yearly sum of \$6.00 for a single person and \$8.00 per family, providing half of this sum is paid to the Secretary-Treasurer not later than July 31, 1945, and thereafter the full sum is paid not later than January 10 in each year except that persons entering the Hospital District must pay this sum within three months after coming to the District. The Board retains the right to refuse to accept this payment, if in its opinion, it is made for the purpose of receiving immediate hospital treatment. In this regard, the family shall mean the father, mother and dependent children only.

The said Hospital District comprises:

All of Township 30, Range 27, 28, and 29, West of the 4th and 1, 2, 3 and 4, West of the 5th M.

All of Township 31, Range 27, 28 and 29 West of the 4th and Ranges 1 to 4, West of the 5th M.

Sections 1 to 6 in Township 32, Ranges 27 and 28 West of the 4th.

Sections 1 and 2 in Township 32, Range 29, West of the 4th.

Sections 1 to 6 in Township 32, Range 1, West of the 5th.

Sections 1 to 12 inclusive in Township 32, Ranges 2, 3 and 4, West of the 5th. Town of Didsbury.

## WORLD HAPPENINGS BRIEFLY TOLD

Four Italian provinces have been returned to the jurisdiction of the Italian government. They are Florence, Livorno, Pisa and Pistola.

Princess Alice, wife of the governor-general, has accepted an honorary life membership in the national council of women.

Sir Edward Bailey, 63, director of the geological survey of Great Britain, has retired. During the siege of Malta he flew there to locate extra water supplies.

Dominion government employees bought a record total of \$19,400,000 in eight victory loan bonds. Purchases in the seventh loan totalled \$18,000,000.

Eric, the famous Piccadilly Circus statue, has spent the war under a protective covering in a house at Egham Green, Surrey. It has been dislocated.

Homesick residents of Tokyo will exist "for the duration" in "dug-out" homes provided to take the place of dwellings destroyed by Superfortress fire raids.

Proposals to raise domestic service in Britain to the status of industry through establishment of a nationally-subsidized training school for maids were made in a government report.

Scores of secret arms and explosive dumps to be used by Nazi "werewolves" in waging an underground war of death and sabotage were uncovered in the forests and mountains of Bavaria and Bohemia by Allied intelligence officers.

Germany lost an average of one submarine every three days between Sept. 3, 1939 and May 8, 1945, official records at London disclosed. A total of 713 U boats was sunk by British, United States and other Allied forces in that period.

## Bridge Engineer

### Harry S. Rimington Receives Appointment From C.N.R.

Harry S. Rimington, who has been in the engineering department of the McKenzie and Mann Company, Canadian Northern and Canadian National railways since 1907, has been appointed bridge engineer for the western region, Canadian National Railways, according to W. C. Owens, general manager for the company. Mr. Rimington succeeds W. Walkden, who retired recently under the pension rules of the company.

Mr. Rimington started railway work as a rodman in Winnipeg in 1907 and later became draughtsman. For several years he carried on this work with the Canadian Northern and McKenzie and Mann interests. In 1912, he was promoted to designing engineer and remained at this work until 1932 when he was appointed assistant engineer. He held this position until his recent appointment as bridge engineer for the western region.

## FARM WAGES

Farm wages continued an upward trend during the past year, the Dominion Bureau of Statistics at Ottawa reported. At May 15 wages were higher in all provinces than a year previous. Rates at that date were approximately the same as August, 1944, which is considered the high point for the year.

## LIFE'S LIKE THAT

By Fred Neher

"You'd better eat all the spinach today, pop . . . because I think YOU'RE gonna have trouble with the father of the kid I licked this morning."

## Prisoner Of War

### How He Was Mistreated By His German Captors

Fifty-seven days in solitary confinement was the fate of Pit. Lt. P. J. McMains, son of Mr. and Mrs. John McMains, Gore street, Perth, Ont., while being grilled by German interrogators after he was shot down in the North Sea.

Pit. Lt. McMains was skipper of a blimp attacking enemy shipping off the Norwegian coast. The Halifax crew spotted an enemy convoy sneaking around the Norwegian coast, and picking out one vessel, they dove to the attack. Just as the final run began the ship turned up all its lights.

Thinking it must be a neutral Swedish ship, McMains pulled the aircraft up. As they passed over, the German captain opened fire at point-blank range and the next thing the pilot knew he was swimming in the water.

The aircraft dingly burnt in the crash and both pilots found their Mae West jackets leaking. Luckily the German ship stopped, picked them out of the water and took them back to Norway.

McMains was soon sent to Germany for questioning and although shot down in October, 1944, he was still in solitary confinement at Christmas.

Penned up in a six by ten foot cell with no air, no light and no bed, the prisoners were brought out for questioning at irregular intervals and no information was given them except when they were thrown back into their lonely cells.

McMains told of the hot and cold treatment. The Germans heated the room but cut off all the heat at night. "We got used to that," McMains said. For nearly two months the coastal command pilot lived on a daily ration that wouldn't make the beginnings of one good meal two slabs of bread a bowl of soup and he had a great lack of维生素. McMains admitted he looked pretty ragged when he came out after the Germans gave up questioning.

For 57 days the poor flier had no blankets and at first had no clothing. For all his discomfort food seemed to be all he thought about.

He recently reached a returned prisoner of war reception centre in England.

In the Old Rectory at Rimpton, England, 83-year-old Brig.-Gen. Sir James Edmunds has completed the official history of the war—not this war but the last—which has taken 30 years and more than 30 volumes.

## Britain Needs Eggs

### Hoops Western Canada May Supply Half Of Quantity Required

The United Kingdom will need 1,000,000,000 eggs this year and Canadian farmers can go all out in egg production, said John A. Peacock, director of egg supply for the British Ministry of Food in an interview.

Mr. Peacock said it is hoped western Canada will supply half of the quantity needed.

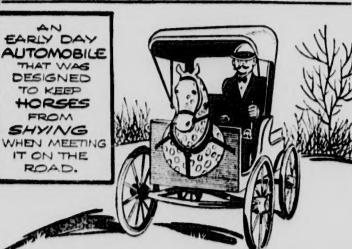

W. A. Brown, chief of the Dominion poultry marketing and production service, said "the British government is going to pay six cents a dozen more for eggs than it did last fall with the increase effective from Sept. 15 until Dec. 31," he added.

## THE COLDEST SPOT

It is believed that the coldest spot in North America is at or near Fort Good Hope on the Mackenzie River, about 20 miles south of the Arctic circle.

Marcel, minister of labor in the Vichy government, who has been condemned to death in absentia, by a French court.

## The Idea Remains

### If Hitler Is Dead Germans Still Believe His Teachings

Without seeking to appear too learned about the mysteries of the mind, we should like to suggest that, whatever the fate of Hitler the man, the Hitlerian idea transcended and will continue to transcend its embodiment in her Fuhrer. The Hitler myth is something that exists in the minds of the Germans who believed in him. What happens to it hereafter, how it will develop, will depend on what happens to those believing Germans and will be affected hardly at all by the discovery of a burned and blackened corpse.—*St. Thomas Times-Journal*.

## Sight Restoration

### New York Has Eye Bank That Collects Healthy Cornea

The public has long been aware that blood banks have been established for furnishing plasma to wounded and sick persons, most modern hospitals having been so equipped. The United States has now an eye bank under the aegis of Sight Restoration Incorporated.

The eye bank is situated in New York, but 22 hospitals in the country are affiliated. It collects and preserves healthy corneal tissue from human eyes for transplanting to persons who have lost their sight because of corneal defects. No other form of blindness can be cured, but it is estimated that up to 15,000 blind people in the United States can have their sight restored by transplantation.

The operation of removing cornea is performed on dead or living persons, and is done by very skilled ophthalmic surgeons whose number is at present limited, but one of the objects of the company is to teach the operation of removing and transplanting by means of regional clinics. The present state of knowledge concerning eye banking can only be preserved for three days before transplantaion, and a group of surgeons engaged studying how to keep the tissue alive for an indefinite period.—*St. Thomas Times-Journal*.

## VARIOUS SIGHTS

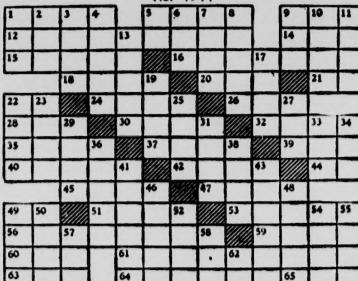

Leonard Lyons, popular author of *The Lyon's Den* in the *New York Post*, is now in Europe. He told this case on himself recently: "The Malet air line office where we made our reservations for a flight to Italy phoned the head office and told his colleague: 'The passenger's name is Lyons. Lyons! L like in Ladislaus; Y, like in Yakutsk; O, like in Omega; N, like in Napoleon; and S, like in Szabo LYONS."

## COLLECTION OF SALVAGE

The collection of salvage material, mostly waste paper, for the month of May amounted to 437,478 pounds. The Ottawa war salvage committee announced. The total collection from inception of the committee to date amounts to 20,754,857 pounds, not including any commercial salvage.

**OUR COMPLETE  
SHORT STORY—****WEDDING DAY**

By W. J. THOMAS

McClure Newspaper Syndicate

Standing very still, her eyes on the little path which wound through mountain laurel stirring faintly in the warm morning breeze, Helen Knowles said, "You shouldn't have come here, Bob, not on my wedding day."

Bob Newfield's voice was low, but very firm. "I don't think Lloyd Tyson can ever make you happy."

Helen felt her lips tremble, kicked a dainty foot at a pebble. Her chin went up. "I know what I'm doing, Bob."

"Even with his whole blasted family smug from five generations of too much money and doing the same things in the same way—hating the idea of just a business woman 'getting' their boy Lloyd?"

"He loves me," said Helen. "Bob Newfield was tortured."

"Who doesn't?" he persisted, smiling and pushing his unruly light hair back from his forehead. "Even I, a radio man who aspires to be a great architect, love her too. That's why I'm here, starting my two-weeks' vacation land crusing in a flyer. Yes, perhaps he loves you, but do you love him?"

"I'm very grateful to him, Goodbye, Bob. Only . . . I'd like you to wish me luck."

"I do, with all my heart. But remember, some day, and soon, you're going to find yourself smooth with the Tysons' cold smugness." He sounded a bit obstinate.

Helen left him, revolving his words in her mind. Why had he come here today of all days after she had tried for months to keep tantalizing visions of him out of her mind?

He was right, so right! Already she knew. The Tysons had insisted on having the wedding here, instead of at Geddele. And she and her mother had allowed them to have their way.

Doubts were assailing her when she reached the Big House—that's what everyone called the Tysons' home, because it exactly described it. A big house. Big, with every bit of furniture and every picture and every rug and every person—precise and formal and proper.

Something was wrong now. She sensed it, but she stopped on the high-pillared porch.

Inside was bedlam in a restrained and wholly proper way.

Lloyd's mother was wringing her hands. "Everything is gone! What do you know about it, Helen?" What shall we do?"

"Your trousers, your clothes?" Lloyd interrupted.

Helen sat down, bewildered. "Will someone please tell me what all this is about?"

Helen's mother was the only calm one in the household. "Your trouser, Helen, has disappeared. Stolen apparently. And your gown, tulle veil, everything. I have persuaded the Tysons that you know nothing about their disappearance. I have told them to telephone the police . . ."

"How can the police help in time

for the ceremony?" demanded Lloyd.

Helen went to Lloyd. "I don't understand—why it doesn't matter, does it, dear? After all, clothes don't make the wedding."

Mrs. Tyson was emphatic. "All of our friends here! The church decorated! And the bride wearing what? Sweater and slacks?"

"Lloyd!" pleaded Helen. But her fiance, despite Helen's appeal, stood by his mother, very stiff hands in his pockets, silent.

For a moment it seemed strange to her that she was not hurt because he made no effort to oppose his mother. Then it didn't seem so strange as she realized that the Tysons could no more have their wedding plans changed than she could go through life without Bob Newfield.

Still, it wasn't easy to take Lloyd's ring from her finger, as she was doing, with all those eyes upon her. As if she were guilty of some disgraceful crime.

"Here, Lloyd, your ring," she was saying. "For all your considerations kindnesses, thank you. I only . . ."

She felt weak.

Her mother said, "Run along," and her soft brown eyes were the only untroubled things in a storm which was rapidly subsiding. "Take a walk, I'll straighten everything out here."

Helen went around the long hedge without a backward glance, quickened her steps over the laurel-lined path. She was spurred by a vague, but compelling hope. Tears came to her eyes.

Through a mist suddenly she saw Bob sitting on the grass, gazing out absently over the patchwork of farm fields below. Then, blissfully feeling his arms holding her close, she told him:

"This can still be your wedding day," he said, grinning. "I'll be the victim."

"Would you marry me—in sweater and slacks?"

"I would, but it won't be necessary."

He led her to his car, parked by a wild crabapple tree, and pointed inside.

There she saw her white net gown, tulle veil and the rest of her trousseau.

"I had to do something to make you see the light, Helen. You know you'll never be happy as Mrs. Lloyd Tyson. So, in the wee small hours this morning I removed—stole, if you please—your sweater and slacks?"

"No, just plain happy. But how did you ever get inside the house?"

"I didn't," he grinned again. "Inside job."

Helen's eyes widened. "You mean . . . ?"

"Of course! Who would help me but your mother?"

**The Indians Knew****Quebec Red Men Were The First To Point The Way To Vitamin C**

Montreal Herald got gratifying statistics. The Canadian government, it says, gives his readers this interesting stuff: "In one year, the Canadian National Railways issues about 2½ million pay checks to over 100,000 employees. To complete matters there are 3,500 Smiths, of which 267 are William Smiths, 238 John Smiths and 152 James Smiths. There are 2,000 Browns, many with the same first name. Then there are Early and Lait, Beck and Call, First and Last, Begin and End, and many others. All these names are well known in Canada. In 1940 March . . . Mrs. P. H. Winters of Lacombe, Alta., dug in her garden, brought up a ring set with sapphires and diamonds which she had lost 18 years ago . . . The dog business got so bad in Chilliwack, B.C., that the township council thought they'd have to tax everybody, then except the whores who had lost a dog. Interviewed in Germany, 21-year-old Mr. Jack Pittman, of White Bear, Sask., regretted he'd only had 7½ months action, and liked it so much wanted to go to the Pacific."

"The complications of business does not deter the editor of the Dauphin Herald from getting statistics."

Montreal Herald goes on to say that the Indians of old Quebec didn't know it but back 100 years ago when they helped Jacques Cartier's scurvy-stricken men during a bitter Canadian winter they were pointing the way to vitamin C."

The Indians showed Cartier how to cure the men of his 1536 exploration party with a bitter brew from evergreen branches which contained this then unknown vitamin.

No scientific proof that the Indians of this tree contain the life-saving vitamin is being developed by scientists at the Toronto Hospital for Sick Children. At the hospital it was discovered spruce trees contain vitamin C in more than twice the proportion of oranges.

**Food Shortage****Says Nothing Mysterious About The World Shortage**

Food Minister Liangsheng declared that there was "nothing mysterious" about the world food shortage and "no one has made the world's supply of food disappear overnight."

In their order of importance lie these causes of short supply:

1. Shortage of farm help due to call-up of men for Allied armies.

2. Lack of fertilizers in producing countries owing to lack of ships.

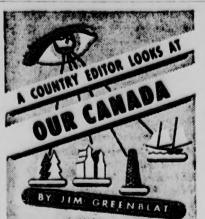

3. Drought in Australia, New Zealand, South Africa, South America and the Caribbean areas.

4. Increased demands due to military forces and needs of liberated countries where production declined under the Germans.

**OFFER OF PRIZE**

The council of the Royal Society of Arts is offering a prize of \$50 (about \$225) to any person of British or allied nationality who has invented a publication or diagram considered an advancement in the science or practice of navigation, between January 1, 1940 and December 31, 1945, it was announced in London.

Nearly 50 places in England bear the name "Sutton" either alone or in combination with others.

**WIN PLYMOUTH!**

**It's Simple! It's Easy! It's Fun!**

**Don't delay! Send in your entry today!  
As many entries as you like!**

**JUST WRITE IN 25 WORDS: "WHY I THINK QUAKER CORN FLAKES ARE MOST DELICIOUS OF ALL"**

**Hint to Help You Win**

- Quaker Corn Flakes are the oven-fresh corn flakes!
- Quaker Corn Flakes are flavourful!
- Quaker Corn Flakes are deep-toasted!
- Quaker Corn Flakes stay oven-fresh. The big blue and yellow Quaker Corn Flakes package is flavour-packed!

**READ THESE EASY RULES**

- (1) Write a statement of 25 words less enclosed: "Why I think Quaker Corn Flakes are Most Delicious of all"; and send it to The Quaker Corn Flakes Contest, P.O. Box 100, Peterborough, Ont. or Saskatoon, Sask. as many entries as you like, provided each is accompanied by a postage stamp (face value) and a return address.
- (2) Entries must be received by August 1, 1945, and will be judged on originality, attractiveness and sincerity, and will not be influenced by fancy writing, illustrated or decorated letters.
- (3) Judges: B. B. Hart, Hart Canadian Grocer; G. W. Hart, Hart Canadian Grocer; A. Tremblay, Le Detallant; their decisions will be final.
- (4) All entries will be returned to sender.
- (5) All entries become the property of The Quaker Corn Flakes Company.
- (6) Cash prizes will be awarded.
- (7) All entries must be postmarked not later than midnight, July 31, 1945.

of beauty and social well-being are setting the trend in this direction and the small town should not feel that such plans are too ambitious. But all these schemes will come to nothing if the public fails to realize that functional homes of beauty to fit into these larger plans cannot be designed without the aid of the experts—the architect and the interior decorator."

• In the little town of Altom, Man., sits an editor like many others in Canada, boasting for something bigger and better to come out of the holocaust of war. In an editorial he muses: "Everyone of us needs both vision and a program, in business, on the farm, in the home, wherever we may be. A child has visions of a picnic and plans for one. An adult envisages a home and spends a long time planning it. So it should also be with town-planning and community building. If we only dream about it and do no planning, we will never have a better community. And planning alone is not sufficient either. We must 'hitch our wagon to a star,' and then prepare practical plans which may make some of those dreams come true."

• The complications of business does not deter the editor of the Dauphin Herald from getting statistics.

Montreal Herald goes on to say that the Indians of old Quebec didn't know it but back 100 years ago when they helped Jacques Cartier's scurvy-stricken men during a bitter Canadian winter they were pointing the way to vitamin C."

"The complications of business does not deter the editor of the Dauphin Herald from getting statistics."

**Special Telephone Room****London, Ontario, Has First Of Its Kind In Canada**

A special telephone room for use of wheel chair patients has been opened officially at London, Ont. The centre is equipped with three booths, one of which is large enough to accommodate a wheel chair and has double doors so that a chair patient may enter and make his call unassisted. Another booth is equipped so that patients who have arm or shoulder braces may use the instrument with a minimum of difficulty.

Luther Burbank grew chestnut trees that produced nuts when they were only six months old and but a few inches high.

**Prickly Heat**

Mentholum quickly cools, soothes, relieves Prickly Heat, Chafing and Sunburn. Jars and tubes 30c. v.11

**MENTHOLATUM**

Gives COMFORT Daily

**AID FOR FIRST BORNEO WOUNDED**—Veteran Australian Infantrymen of the crack Ninth Division, wounded in the early fighting on the beaches of Borneo, are shown being carried on shoulder-borne litters across a stream to a first aid station. Their division later captured the Brunei air strip and drove the Japs inland.

**MANY DEATHS BY DROWNING  
SAID TO BE NEEDLESS**

With the summer vacation season upon us, the Health League of Canada points out that many deaths from drowning can be prevented—if first by running no unnecessary risks and second by the prompt and long-continued use of artificial respiration methods when accidents occur.

Several years ago there was an intense agitation for more care in rescue efforts, it being stated that victims died because artificial respiration was discontinued too soon. They died because all necessary efforts were not made to revive them—because the possibilities of artificial respiration still were not fully realized.

There are well-authenticated reports of artificial respiration being successful after as many as five hours. In cases of electrical shock, at least one instance is known of a patient being revived after being apparently dead for eight hours. This being true, it is an extraordinary thing that reports still come in of artificial respiration being discontinued after a mere half hour of effort.

It is pointed out that even if the victim has been in the water for as long as 30 minutes, there is a chance that life is not extinct—though resuscitation methods have a chance of bringing back consciousness.

Also, it is emphasized, artificial respiration must be started as quickly as possible and continued for a long period six hours or longer. It is not until rigor mortis sets in that life can be assumed to be extinct. One of the most documented cases of life revival is that of a child, brought back to life after five hours' active work and hours after the child had pronounced dead.

It is also important that those using artificial respiration be sure that air enters the lungs properly while they are working on the patient. There is always a possibility that a spasm of the larynx occurs and that the victim suffocates rather than the drowning patient.

The most popular method of artificial respiration is the Schaeffer method. In this, the body is suspended gently by the waist to allow water to run off. The head is then placed in a position with the head and chest lower than the rest, if possible. The head should be placed on one side on one of the patient's arms. The rescuer kneels astride the victim and applies pressure rhythmically in the region of the lungs. If possible, the patient should be kept warm with blankets and hot water bottles.

Rescuers should remember these five points:

1. Clear the patient quickly.
2. Start artificial respiration without delay.
3. Use warmth if possible.
4. Do not stop artificial respiration until the patient breathes or there are definite signs of the onset of rigor mortis.
5. After the patient is breathing, do not allow him to sit up, stand, or walk, but transport him in a lying down position and put him to bed.

**BEST REVOLVER SHOT** — Constable Dorothy Colley of the Guelph police department, winner of the trophy for best police women revolver competition staged at Guelph, Ont., by Police Association of Ontario, and Wellington county police.

**"Open-Out" Dress**

By ANNE ADAMS

When the temperature soars, the button-down "open-out" dress is a real pal. Pattern 4549 comes in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40, 42. Size 16 requires 3½ yards 36 inches (cannot be cut and pieced) for this pattern.

Write plainly, Name, Address and Style Number and send orders to The Anne Adams Pattern Co., Winnipeg, Manitoba, N.W.T. Union, 175 McDermott Ave., E. Winnipeg. Man. "Because of the slowness of the mail delivery of our patterns, may take a few days longer than usual."

**THEY STEPPED LIVELY**

One bus driver in Milwaukee didn't have any difficulty in getting passengers to "step to the rear of the bus". The passengers made a bee-line for the rear and right out the back exit when a small boy permitted a half-dozen harmless garter snakes to escape from their shoebox container.

A patent was issued a few years ago for canned pancakes neatly rolled and placed in the container like asparagus stalks.

**What is worth \$5,  
And Sells at 10¢?**

Did you know that a 10¢ package of WILSON'S FLY PADS will kill more flies than 50¢ worth of any other? Kill them all the day when you use WILSON'S FLY PADS!

**LOCAL  
NEWS**

For painting and repair work apply to C. Rapier, East Didsbury.

Mrs. Garner and Edith, and Patsy Wood are spending a week in Banff.

Mr. and Mrs. John Krueger arrived last Monday from Lethbridge. B.C. Mr. Krueger returned home on Sunday, but Mrs. Krueger will visit here with relatives for a time.

Mr. and Mrs. H.S. Beveridge of Medicine Hat are holidaying in town with the Mrs. Beveridge's father, A.G. Stader.

Mr. and Mrs. V.O. Johnson have returned from a holiday trip to Banff, Jasper, Cranbrook, and other B.C. points.

Mrs. Farrett and Mrs. R. Muirhead of Rosedale, B.C., are visiting with Mrs. Harry Jackson.

Mr. and Mrs. Ken Cassidy and family have returned from a motor trip to Nelson and other B.C. places.

Ed Wiggins left Monday and will spend the next couple of weeks at Vernon and Lumby, B.C.

Mr. and Mrs. Walter Irvin left Sunday on a trip to British Columbia.

Tel. C.W. Johnson who has been visiting with his parents Mr. and Mrs. Bryan Johnson for the last five weeks, is busy walling up the basement and hopes to meet the writer of "Sailing, Sailing, Over the Ocean Blue" etc.

Dr. and Mrs. J.L. Clarke returned to Didsbury last Wednesday after spending the past five weeks in the East, where the Doctor attended a Medical Congress in Montreal in June. They visited with relatives and friends in Prince Edward Island and other eastern points, and report a wonderful trip. However, the Doctor says he never saw any place that would compare with our own Didsbury district.

"Hollywood Canteen," two hours of thrilling entertainment with an all-star cast, is the picture showing at the Didsbury Theatre on Thursday, Friday and Saturday, July 20, 21 and 22, and Monday, Tuesday and Wednesday, July 23, 24 and 25. The picture is "Swing In The Saddle" with Jane Frazee, Slim Summerville and Gunn Willems.

**EVANGELICAL CHURCH NOTES**

Alberta Camp is now in session. This camp is 19 miles west of Didsbury and one mile north of Elkhorn school. Worship service is held each morning at 8 a.m. Young People's Study Class and Bible Class at 9:30 a.m. and at 1:30 p.m. Dr. Paul S. May of Cleveland, Ohio, Field Secretary of the Missionary Society, will conduct the Mission Study Hour at 10:40 a.m. He has been superintendent of missions for many years in Alberta and has been in the ministry for two years. On Saturday afternoon the Talent Hour will be held at 2:20 p.m. The young people will present musical numbers etc. Evangelistic services will be held each evening at 7 p.m. Dr. and Mrs. Mayer will be the speakers.

On Sunday, July 22nd, the Sunday school will be held at 9:45 a.m. The morning service will be at 10:30 a.m., when Dr. Mayer will preach. Women's Missionary Society Rally will be held at 2:30 p.m. when Mrs. J.V. Berscht will be in the chair. Dr. Mayer will bring the Missionary message at 7 p.m., and he will also preach the concluding message of the young people's rally.

Monday, July 23rd, the W.M.S. Rally will continue. There will be sessions at 9:30 a.m., 2:00 p.m. and 7:00 p.m. Dr. Mayer will preach in the afternoon and the evening.

We extend a cordial invitation to all to worship with us in these services.
